

# NeoClose®

## Robotic and Laparoscopic Closure System

- Faster
- Safer
- Less Port Site Pain

NeoClose delivers absorbable anchors pre-attached to absorbable suture [through transparent guides] for a quick and simple port site fascial closure process. This innovative anchor technology eliminates the need to “fish” for sutures and approximates the tissue, providing secure fascial closure without nerve entrapment. NeoClose: faster and safer than traditional looped suture with less patient port site pain!\*

Reimagining  
Surgical  
Closure™

  
Sharp Fluidics®

# NeoClose - Surgical Closure Reimagined

NeoClose utilizes absorbable anchors to achieve greater strength while reducing tension on the tissue by up to 75% compared to standard suture loop closure.

NCAGR-U	NeoClose Closure Device Regular
